PERSONAL SUMMARY

Frontend Engineer dedicated to building highly performant, visually striking web applications. Combining a strong foundation in modern React ecosystems (Next.js, TypeScript) with hands-on experience shipping production-ready features in fast-paced environments. I bridge the gap between complex technical architecture and pixel-perfect UI, keeping Core Web Vitals and user experience at the forefront. Backed by a BCA in Computer Science and data analytics training, I bring a structured, performance-driven mindset to engineering problems, clean code reviews.

SKILLS

React.js | Tailwind CSS | JavaScript (ES6+) | TypeScript | Angular | Component Architecture |
React Native Development | State Management (Redux, Recoil) | Git & GitHub | Jira | HTML and CSS
| C++ | OPSS | GraphQL integration | Authentication protocols

AI-Augmented Development

- Integrate AI coding tools — Claude Code, Cursor, and Gemini — into daily frontend work, using them to scaffold components, debug edge cases, write tests, and refactor legacy code significantly faster than a traditional workflow allows.
- Use Figma Make (AI) to translate PRDs directly into polished UI designs for internal tools, enabling rapid iteration without a dedicated design cycle and cutting the idea-to-prototype timeline considerably.
- Built an end-to-end automated bug-fix pipeline using MCP (Model Context Protocol) servers: a Slack mention triggers Claude to read the linked ticket, write the fix, and raise a PR automatically — compressing what was a 2–3 hour resolution cycle down to minutes, with a human review gate before the fix reaches QA.

Experience

Associate System Engineer

CodeTikki

January 2026 – Present

Uttar Pradesh, India

- Engineered a dynamic, real-time Quiz Management System that handles live question rendering and per-user performance tracking, reducing latency in result feedback by eliminating page-reload cycles for a growing base of EdTech students.
- Developed and optimised the Personalised Profile and Dashboard modules, consolidating progress metrics, streak data, and achievement analytics into a single, responsive view — increasing session engagement by surfacing actionable insights directly on login.
- Led a platform-wide branding overhaul (Logo, Title, Favicon) by standardising asset delivery and viewport-responsive rendering across all breakpoints, eliminating inconsistency across 100% of the platform's pages.
- Refactored legacy UI into a library of reusable React components styled with Tailwind CSS, cutting code redundancy and reducing future feature-development time through improved maintainability.

Freelance Frontend Developer

Knoqq (Home-Services Platform)

May 2026

Bengaluru, India (Remote)

- Designed and delivered a high-converting, mobile-first landing page for Knoqq (Knoqq.com) using React.js and Tailwind CSS, achieving a Lighthouse performance score of 95+ which directly supports strong SEO rankings and lower bounce rates.
- Implemented custom UI components with a mobile-first methodology, ensuring the page renders correctly across all device sizes and meets Core Web Vitals thresholds for Largest Contentful Paint and Cumulative Layout Shift.
- Engineered the Knoqq marketing website using Next.js and Tailwind CSS, focusing on pixel-perfect execution and motion design that elevated brand aesthetic while optimizing Core Web Vitals to achieve a 95+ Lighthouse performance score.
- Transformed Knoqq's digital presence by engineering a pixel-perfect, mobile-responsive marketing engine that balances rich motion design with extreme performance; optimized asset delivery and code-splitting to maintain a 95+ Lighthouse score, directly improving organic discoverability and user trust.

Projects

Quiz Management System — CodeTikki

React.js, Tailwind CSS, Real-Time Rendering

- Built a full-featured quiz engine supporting dynamic question generation, real-time answer validation, and a results dashboard — enabling instructors to deploy interactive assessments without backend configuration.

User Profile & Achievement Dashboard — CodeTikki

React.js, Analytics, Component Design

- Developed a data-rich user profile page that aggregates learning streaks, course completion rates, and badge achievements, giving learners a single view of their growth and motivating continued platform engagement.

Knoqq Landing Page

React.js, Tailwind CSS, SEO, Lighthouse 95+

- Delivered a production-ready marketing page from brief to deployment in under one month, incorporating SEO meta structure, responsive image handling, and scroll-optimised layout sections that convert visitors into sign-ups.

Education

Bachelor of Computer Applications (BCA)

COER University, Uttarakhand, India

Oct 2022 – May 2025

Certifications

- **Tata GenAI-Powered Data Analytics Job Simulation** — Forage / Tata Group
- **Web Development Bootcamp** — Udemy
